Referencing...

is recording information about where you find your information. A list of sources is called a bibliography. A list of sources that you have cited or referred to is a reference list. Both of these are included at the end of your work.

Referencing a Website

Example:

When referencing a website, include this information:

1. **Author/person/organisation responsible for the site**
2. **Year (Date created/last revised) (comma)**
3. **Name of site (comma)**
4. “viewed” (then day month year) (comma)
5. **URL <between pointed brackets> (full stop)**
